ABOUT ME

Through my diverse and rigorous technical curriculum, I have built a unique skillset fit for any role I would find myself in at your firm. Moreover, I already have strong experience putting my knowledge to use outside the classroom. Indeed, I have started 2 successful businesses to date, giving me a professional maturity that would make me a strong asset for your company. Through my experiences, I have grown comfortable with handling ambiguous problems and working independently, making me a compelling candidate.
